

Data Protection as a Service

Instant Recovery Storage

Compressed and Encrypted

Long-term Archiving

Offsite backup, with a little extra

Go beyond your traditional backup strategy with Data Protection as a Service. DPaaS offers broad data protection by combining the convenience of local backup for instant restores with offsite copies for additional protection, and long-term archiving storage to meet your compliance needs.

We'll keep your data in the cloud for you so you can access it from wherever you are and avoid vendor and software lock-in.

Restores in minutes

Erase accidents or power failures with one click, and restore local databases 10TB or more in minutes

Tailored retention policies

Choose how long you keep your local data

Compliant long-term archiving

Meet compliance requirements with easily accessible long-term data archiving storage

Improve developer agility

Instantly clone and sanitize production databases for dev/testing purposes
