# OTManage

Server performance reports

Historical logging and trends

Asset and change management

| 24/7 Technical Support | Managed Server Monitoring | Patch Management |

## Remove server management strains

You can rest easy knowing our team of experts is watching over your infrastructure and taking care of all the maintenance that comes with it.

With amber light tracking, constant server monitoring and daily walk-throughs of our data centers, our certified technicians quickly locate potential server issues and proactively prevent them from escalating.

### ✓ Dedicated first responders
Our team will troubleshoot any issues your servers might have and provide a proactive remediation solution

### ✓ Broad environment support
Management for OS's includes Microsoft Windows Server, CentOS Linux, Red Hat Linux, and Ubuntu, hosted in colocated, private cloud or Microsoft Azure environments

### ✓ Worry-free maintenance
We'll handle the routine maintenance, including OS patch management, configuration support, and AV updates
