Easily view server performance reports

Server monitoring with custom criteria

One Pane of Glass

Real-Time Monitoring

Customized Reports

A real-time pulse on your servers

Worry less about what your servers are doing and focus on your core business with OTMonitor. Our clientless system will continuously watch over hardware and network performance, general server health, and ensure seamless end-user experience.

Complete server visibility

View real-time server CPU use, drive space, cache, bandwidth, network traffic, and memory performance usage through OTPortal®

Support across environments

Microsoft Windows Server, CentOS Linux, Red Hat Linux, and VMware monitoring supported

Customized reporting

Weekly and monthly reporting available via email or SMS
