

OTPortal™ Platform

Add resources to your new or existing cloud servers

Track your cloud use and monitor your environment

Test your disaster recovery plan

One Call

One Pane of Glass

One Bill

A single pane of glass for your environment

Our OTPortal™ platform gives you a single window in which to view your environment with Online Tech.

From here, you can add resources to your existing cloud servers, monitor and change your bandwidth, view and answer support tickets, track your cloud expenses, test your DR plan, and more. Whatever you need, it's all done in just a few clicks.

Scalability at your fingertips

Add RAM, CPU, or storage to your servers, or turn them on or off depending on your needs

Monitor your environment

See exactly how much bandwidth you're using

Real-time support updates

Get up-to-the-minute updates of your support tickets and see any archived tickets from earlier jobs

Stay compliant with DR testing

Test your DR plan in just a few clicks
