

THE RIGHT CLOUD FOR THE RIGHT JOB

Whether you're looking for public or private cloud, Online Tech has the solution for you. Built with an all-flash array, our private and virtual private clouds can deliver the performance you need without sacrificing security. Combine any of our cloud hosting options with managed public cloud to create the unique hybrid environment that perfectly fits your business.

MANAGED PUBLIC CLOUD

Overcome the challenges of public cloud management such as configuring, deploying and managing complex platforms, confusing billing and lack of specialized talent with Online Tech's managed public cloud with Microsoft Azure. Simply choose where you want to run your applications, and our experts handle the rest.

VIRTUAL PRIVATE CLOUD HOSTING

Adhere to compliance requirements without the cost of extra hardware with virtual private cloud hosting. Add storage, networking or compute resources as you need them or reconfigure your existing resources how and when you want to.

DEDICATED PRIVATE CLOUD HOSTING

Get complete data privacy and peace of mind with hardware, networking and storage components dedicated solely to your organization. Your sensitive information is completely isolated from other parties and you have complete visibility about how the data is handled.

SPRAWLGuard™: SEIZE CONTROL OF YOUR SPENDING

Our managed public cloud services with SprawlGuard™ help you avoid the complexity and confusion of multiple bills for your monthly spend. Get full transparency into your cloud bill and get alerted when your spend unexpectedly increases.

HYBRID CLOUD with SprawlGuard™

OPTIMIZE WORKLOADS & CONTROL SPEND

ONE PANE OF GLASS: FULL MANAGEMENT OF YOUR SERVICES

If you have virtual or dedicated private cloud services, it's easy to integrate your existing or new Azure environment so you get a complete view of your entire system in a single window. With our single pane of glass, you can avoid cloud sprawl, better manage your costs and be warned if your spending might exceed your monthly budget.

ONE BILL: SEIZE CONTROL OF YOUR SPENDING

Our managed public cloud services help you avoid the complexity and confusion of multiple bills for your monthly spend. Using SprawlGuard™ and our seamless integration with Azure, we make it easy to understand and control your IT costs with a single bill for all your services, whether you use public or private cloud, colocation or a combination of services.

ONE CALL: OUR EXPERTS ARE YOUR EXPERTS

Take advantage of our experts and consider them an extension of your IT department. We'll walk with you and your team through the configuration and deployment processes, then manage your entire environment for you 24/7. We proactively respond to any potential problems to eliminate unwanted surprises, so you can rest easy knowing your critical systems are safe. Have a question? We're only a call or an email away.
