

SprawlGuard™ Protection

Recommendations on how to lower your cloud bill

Enhanced visibility into your cloud spend

Sophisticated alerts on cloud waste

Simplified Billing

Sprawl Protection

Optimized Workloads

Seize control of your cloud spend

SprawlGuard™ technology is a unique, powerful tool specifically designed around cost containment to help you control and manage your public cloud spend.

You define precise cost centers, and watch SprawlGuard™ technology employ advanced usage analysis on a daily basis.

Billing at a glance

Your bill is divided into easy-to-understand categories so you know exactly what you are paying for

Visible changes in your spend

Impacts your cloud cost outlook so that you can see potential sprawl as workloads come online

Environment optimized daily

Our environment analysis alerts you to over-allocated, forgotten, or non-persistent workloads

Catch sprawl before it happens

Predictive modeling indicates how much sprawl you could incur that month
